

CellTech

TRAILERS

LEADING CARGO INDUSTRY TECHNOLOGY!
3-LAYER ALL STEEL LIGHTWEIGHT PANELS

CellTech
metals

CellTech's revolutionary technology was developed with a bi-directional metal core, positioned and bonded between two metal sheets. This provides an airflow structure eliminating the encapsulation of moisture, helping to prevent any possible corrosion.

CellTech panels have been vigorously tested by major trailer OEM's and surpasses all requirements specific to bending, compression and shear stiffness, along with extensive corrosion salt spray tests.

CellTech is 100% recyclable and made in the USA.

ENGINEERED

Designed by our PHD engineer, creating a unique panel product for extreme toughness and durability.

PERFORMANCE

CellTech Trailers are built for industrious use, with strenuous walls to carry significant cargo and equipment loads.

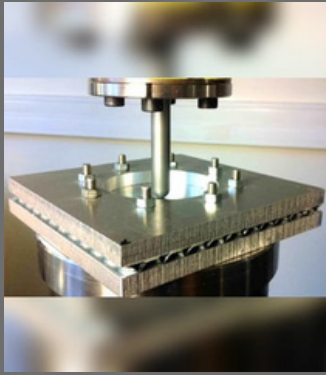

AESTHETIC

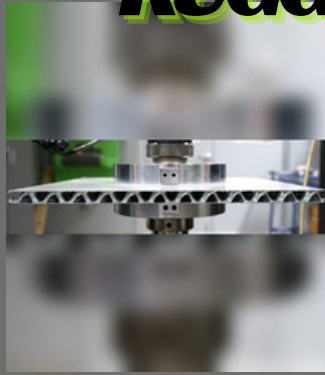

Smooth exterior walls provide the perfect surface solution for decals and advertising print. Unlike our competitors with walls filled with rivets and screws.

PANELS TESTED TO ENDURE YEARS OF RUGGED USE

PUNCTURE/DENT TESTS

COMPRESSION TESTS

BENDING TESTS

PEEL TESTS

KEY FEATURES:

All-Steel with Lightweight panel technology

PHD engineered for Sustainability

Designed to Endure Aggressive Work Environments

Significant Weight Load Capabilities

Numerous Industrial Cargo Applications

Customized Wall Tracks for Organizing and Efficiencies

Aerodynamic, Reducing Drag and Improving Fuel Performance

Environmentally Friendly – 100% Recyclable

10-Year Panel Warranty

LIFETIME TRAILER
